

Java

```
class Solution {  
    public int[][] highestPeak(int[][] isWater) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number[][]} isWater  
 * @return {number[][]}  
 */  
var highestPeak = function(isWater) {  
  
};
```

C++

```
class Solution {  
public:  
    vector<vector<int>> highestPeak(vector<vector<int>>& isWater) {  
  
    }  
};
```

C#

```
public class Solution {  
    public int[][] HighestPeak(int[][] isWater) {  
  
    }  
}
```
